SUMMARY

I'm a Software Developer in MCAL with over 2.5 years of experience with high responsibility in the development and producing quality work. Besides that, I've developed a skill set directly relevant to the Front-end developer role with good knowledge in ReactJS, JavaScript, HTML, CSS, SCSS, and Bootstrap. I'm willing to collaborate with new opportunities and challenges.

TECHNICAL SKILLS

- **Hard skills:**
  - ReactJS, JavaScript, HTML, CSS, SCSS, Bootstrap, Redux (Redux Saga, Redux Thunk), responsive
  - Good understanding of OOP methodologies, design patterns.
- **Soft skills:**
  - Version control: Git, SVN.
  - Project management: Jira.
  - Problem-solving, teamwork, research.

PROJECTS

Jira clone built with React (personal) [1]
- Description: A project ReactJS cloning with some features simulated from Jira: CRUD operation, each project manages multiple tasks, assign members to project/task, comment, and change the status of task by drag and drop.
- Technologies: ReactJS, SCSS, Ant Design, Redux, Redux-Saga, Axios.
- Main role: Project organization, components. Coding front-end side with fully responsive on Mobile and Desktop
- Github: https://github.com/dhthinh7/Jira_clone
- Live Demo: https://git-jira-clone.netlify.app

Movie tickets online booking (personal) [2]
- Description: This project display information on movies, showtime, login, logout, and records the history of booking. Decentralization type of client (users, admin). The admin can do CRUD operations, instead of only booking tickets.
- Technologies: ReactJS, SCSS, Ant Design, Redux, Redux-Thunk, Axios.
- Main role: Project organization, components. Coding front-end side with fully responsive on Mobile and Desktop
- Github: https://github.com/dhthinh7/movie_tickets_online_booking
- Live Demo: https://moviesbookingonline.netlify.app

Wealth Care (2 members)
- Description: Personal Wealth Management (Suspending)
- Technologies: ReactJS, SCSS, Ant-design, Redux, Axios, Chart.js library.
- Main role: Project organization, coding layout from design from Figma.

[1], [2] API is provided by the Cyberlearn center. [3] API is handled by another member in project team.

EXPERIENCES

11/2021 | 10/2022	**Learning at Cybersoft Academy** - With background as a Software developer, I quickly catch up and achieved deep knowledge in front-end development related.
03/2020 | 09/2022	**Software developer at Renesas Design Vietnam** - Support Renesas Japan in handling driver testing phase. - Implement tool to support making reports in PRM process (**Save 50% of the time**). - Analyze hardware specification to improve, fix bugs from the released device, and implement new device with full process design - code - test. - Mentoring fresher member to ensure product quantity. - Communication with CI/CD team to announce errors of jobs and improve jobs result.
